

Less paperwork. More attention to the patient.

Endoumi turns spoken findings into an editable report draft and connects patient registration, examination and clinical review in one clear flow.

AI-assisted documentation with clinician approval

From patient intake to a completed report

Built for the whole team

INTAKE

Register patients and capture the pre-exam questionnaire.

EXAM

Record observations naturally while staying focused on the procedure.

REVIEW

Check, edit, approve and print the final report.

What reaches the report

- ✓ Structured EGD and colonoscopy findings
- ✓ Diagnosis, location, size, biopsy count and CLO status
- ✓ Follow-up guidance aligned with hospital policy
- ✓ Print-ready output in Korean or English

Designed for everyday endoscopy work

Speak naturally

Use voice during the examination instead of stopping to type.

Review clearly

Turn raw observations into a consistent, editable clinical draft.

Stay in control

The clinician reviews and confirms every final report.

One connected flow for the endoscopy team.

Reduce repetitive documentation and keep each patient moving from intake to an approved report.
